PROFESSIONAL SUMMARY

Information Systems Technologist with 2+ years building and deploying fullstack web applications across startup and enterprise environments. Experienced in React/Next.js frontend, Python and Node.js backend, REST APIs, database design with PostgreSQL and Supabase, containerization with Docker, workflow automation with n8n and IT support including configuration and preventive maintenance of computer equipment and devices. Has taken features from development to production, including payment integrations, bot systems and SaaS platforms.

EXPERIENCE

MMM MARKETING

Software Developer
JULY 2025 – JANUARY 2026

- Build and deploy a fullstack end-to-end platform (Python/Supabase + React/JavaScript), delivering a complete product from development to production.
- Integrate MercadoPago payment gateway enabling 2 payment methods (electronic and cryptocurrency) within a single flow, increasing conversion options for end users by 100%.
- Develop and connect multichannel bots (WhatsApp, Telegram, Instagram and web) with n8n, automating 60% of user interactions and reducing the social media team's manual workload.
- Containerize the application with Docker and manage infrastructure on Hostinger and Easypanel, achieving over 99% service availability in production.
- Reach approximately 70% functional completeness of the product alongside the team, with core features stable and pending improvements identified for future iterations.

K4PITAL

Software Developer
AUGUST 2024 – JULY 2025

- Develop a financial SaaS application in a team environment using Next.js, React, TypeScript and Tailwind CSS, supporting simultaneous tracking of multiple investment portfolios.
- Design and implement a full backend (REST APIs, database and authentication) with Hono, Drizzle ORM, Neon and Lucia, reducing new module integration time by 30% throughout the project.
- Integrate OpenAI to automate financial insight generation, eliminating 80% of the manual analysis required by users to interpret their portfolio behavior.
- Optimize frontend performance using React Query and Zustand, reducing data load times and improving the application's SEO positioning through Next.js server-side rendering.
- Automate an email notification and alert system for portfolio events, increasing active user engagement.
- Develop and integrate a WhatsApp bot as an alternative data entry channel, allowing users to log income and expenses directly from the messaging app and reducing usage friction by 90%.
- Collaboratively achieve 85% functional completeness of the SaaS application, with all critical modules live and stable in production.

FREELANCE - GEOGEBRA SCRIPTING

Technology Solutions Developer
APRIL 2025

- Build interactive applets in GeoGebra for the dynamic visualization of mathematical theorems and concepts, eliminating the need for static materials across all covered topics.
- Implement parameterizable animations and dynamic functions, enabling users to explore multiple configurations in real time within a single applet.

UNIVERSIDAD DEL VALLE

Administrative Assistant
MARCH 2023 – JULY 2024

- Build web forms using Google Apps Script, JavaScript and Bootstrap to automate staff data collection, replacing fully manual processes and feeding directly into Excel reports, reducing data consolidation time by approximately 40%.
- Manage the setup and installation of computers and audiovisual equipment across 20+ academic and administrative events, ensuring zero technical failures during execution.

EDUCATION

Technical Secondary Education – Specialization in Computer Science

Corporacion Educativa Popular Liceo de la Amistad - 2016

Information Systems Technologist

Universidad del Valle - 2024

ADDITIONAL TRAINING

Certification in Artificial Intelligence

Talento TECH (MinTIC – Colombia) - 2025

English

Centro Cultural Colombo Americano - 2025

TOOLS AND SKILLS

- HTML5
- CSS3
- Node.js
- SQL
- Javascript
- React.js
- Linux
- Windows
- Mac
- Python
- Prompt engineer
- Machine learning
- n8n
- Docker
- Typescript
- NoSQL
- Supabase
